AGRICULTURAL STATISTICS AND PRICES FOR LOUISIANA, 1976-1979

by

Lonnie L. Fielder, Jr. and Bergen A. Nelson[1/]

This publication presents statistical data for Louisiana's agriculture for the period 1974-1980. Six types of data are presented. Annual data for the state are presented for income and expenses in the first part (Tables 1 through 4). In the second part census data are presented on farm numbers, size and land use (Table 5). In the third part (Tables 6 through 28) annual data are presented for the state for acreage, yield, production, disposition, price, and value of crops. In the fourth part (Tables 29 through 56) annual and monthly data are presented for livestock numbers, and production, disposition, price, and value of livestock and livestock products. Data on acreage, yield, and production of crops, by parishes, are presented in the fith part (Tables 57 through 63). Annual price indexes and monthly and annual prices received and paid by Louisiana farmers are presented in the sixth part (Tables 64 through 71).

Data for years prior to 1974 are presented in two previous publications[2/] and are available upon request to the Department of Agricultural Economics and Agribusiness, Louisiana State University, Baton Rouge, Louisiana, 70803.

The compilations in this report were made from two sources: (1) Releases by the Field Operations Office, Economics, Statistics, and Cooperatives Service, and other releases by the United States Department of Agriculture, and (2) Agricultural Reports of the Census, United States Department of Commerce.

1/ Dr. Fielder is a professor in the Department of Agricultural Economics and Agribusiness, Louisiana State University. Mr. Nelson is the Agricultural Statistician in charge, Louisiana Field Operations Office, Statistical Reporting Service, United States Department of Agriculture, Alexandria, Louisiana.

1/ The 1978 census data collection program was the first to include an area segment sample to provide reliable estimates, for states, of the number and the characteristics of any farms not represented in the mail portion of the census. Estimates for such farms are an integral part of the totals shown in the State reports, but are not included in county (parish) totals. The contribution of the area segment sample to the State total are shown in parentheses to the right of the 1978 Census State total.

THE DEPARTMENT OF AGRICULTURAL ECONOMICS AND AGRIBUSINESS
LOUISIANA STATE UNIVERSITY

The Department of Agricultural Economics and Agribusiness at Louisiana State University carries on an extensive and coordinated program of teaching, organized research and public service in a wide variety of professional subject matter areas.

Subject matter areas include:

- Agricultural business management
- Farm organization and management
- Statistical analysis of agricultural data
- Resource, rural and community development
- Environmental economics and ecology
- Marketing - (general and commodity)
- Agricultural policy and public programs
- Land and water economics
- Applied computer programming
- Cooperatives
- Price analysis
- Tropical resource development
- Farm records and accounts
- Agricultural credit and finance

The department's research in these areas is part of the organized research program of the Louisiana Agricultural Experiment Station, a division of the University's Center for Agricultural Sciences and Rural Development. Much of the research is in cooperation with other departments in the College of Agriculture, the Louisiana Cooperative Extension Service, state experiment stations, the USDA, and other State and Federal agencies.

The combination of teaching, organized research and service provides an efficient, effective and productive use of resources invested in higher education and service to the public. Emphasis in research is on solving practical problems important to various segments of the economy. Research results are made available for immediate use in the classroom and to action agencies for direct application to problems in the field. The Louisiana Cooperative Extension Service and other educational and action agencies, including the Department of Vocational Agricultural Education, the Farmers Home Administration, the Soil Conservation Service, the Federal Farm Credit System, other government agencies, farm organizations, business and industrial firms, as well as individuals, receive and use the Experiment Station's research results in the economics of land use, farm credit, resource, community and rural development, agricultural production and marketing, agribusiness, cooperatives, and public policy.

The department's coordinated teaching, research and service program provides professional training for careers in a wide variety of occupations in education, agribusiness, industry and government service. Departmental course work is supplemented by courses in other disciplines, particularly in the College of Agriculture and the College of Business Administration. Academic programs lead to degrees at three levels: Bachelor of Science, Master of Science, and Doctor of Philosophy. Course work in all curricula provides knowledge of tools and techniques useful for decision making. Emphasis in the undergraduate program centers on developing the student's managerial ability. The graduate program builds on the undergraduate background, strengthening basic knowledge and adding more sophisticated analytical skills and business capabilities.
